1 Subject area

This project tackles the arabic hate speech classification using Pre-trained Multi-task Learning Models

2 What's the goal !!

- Evaluating and comparing the performance of the model
- Adapting an existing MTL-DNN model to perform Arabic hate speech classification

3 Why is it important?

this project aims at building an Arabic hate speech classification model to deal with the increasing hate comment on social media

4 Preliminary ideas

- collecting dataset concering the arabic hate speech
- using the language model BERT
- adapting LM for multi-task learning
